Training

Trainer: Sachiko Butler

Date: September 2004

Who is our trainer?

- Sachiko Butler
- Technical Trainer and Instructional Designer
- Over 8 years of experience
- With CACI since November of 2003
- Has delivered training for training centers, post offices, NYC fire dept, NJ State Police, UN, hospitals, dotcoms, pharmaceuticals, law firms, offices, banks and abroad
- Wrote and Delivered training on portal based collaboration systems, such as this one, for Goldman Sachs and Pfize

Introductions

- Tell us your Name
- Job Function /Rank
- Give a little background
- What type of projects are you working on?
- Any previous portal or web browser experience?
- What do you want to gain from training?

What is SigWarNet?

http://signalswarfare.monmouth.army.mil

- Unclassified
- Web-based
- Enterprise-level project management and resource collaboration tool for the Project Manager Signals Warfare portfolio of systems.
- Provides a centralized and customizable view of all aspects of contract information.
- Any time and Any place an Internet connection is available.
- Authorized **SigWarNet** personnel include: project managers, coordinators, customers, employees, subcontractors, and support staff.

What's Available in SigWarNet?

- Calendars & Schedules
- Tasking / Action Items
- SAR / SigActs
- Travel Itineraries
- Personnel Roster
- Help Desk Ticket System
- Announcements & News
- IPT Working Groups
- Document Collaboration
- Document Version Control
- Document Repository
- Keyword Searching
- Open Source Intelligence
- Information Assurance Docs

SigWarNet Training Highlights

Duration: 4 hours

- What is SigWarNet?
- Login/ Logout
- Password Protection/ Account Info
- Getting Around
- Announcements
- Personnel Roster, Teams and Groups
- Searching and Keywords
- Favorites
- Scheduling/Calendar
- Tasking/ Action Items
- Working with Folders and your Personal Folder
- Creating Sub-folders and Setting Access Privileges
- Uploading, Editing and Deleting Documents and Files
- Document Versions and Expiration
- Document Collaboration
- Creating & Uploading Zip Files
- Travel & Managing Itineraries
- Support

Welcome to SigWarNet
SigWarNet is a web-based, enterprise-level project and resource collaboration tool for the management of the Project Manager Signals Warfare portfolio of systems.
Department of Defense Security Warning
This official U.S. Government System is accredited for UNCLASSIFIED and authorized use only. Do not enter, process, store, transfer, or transmit classified or sensitive information above the level of this system. DOD networks may be monitored for all lawful purposes, including to ensure their use is authorized, for management of the system, to facilitate protection against unauthorized access, and to verify security procedures, survivability, and operational security.
All information, including personal information, placed on or transmitted over this system, authorized or unauthorized, constitutes consent to monitoring. Unauthorized use of this DOD system may subject you to criminal prosecution. Evidence of unauthorized use collected during monitoring may be used for administrative, criminal, or other adverse action.
Use of this system constitutes consent to monitoring for all lawful purposes.

Local intranet

Forgotten Password:

If you forget your password or userid, click on Request Password Reset to send an email to the SigWarNet Help-Desk.

New Users:

To request a user account, click on Download Request Form. Follow the directions to fill out and fax a completed form to PM SW Security for approval.

Change your Password:

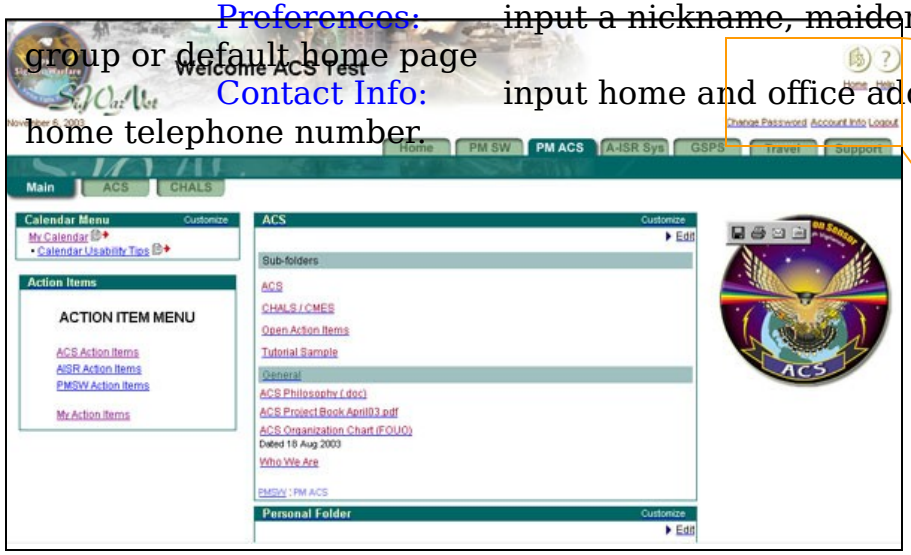
Change your password by clicking on the Change Password link in the top right corner of any SigWarNet tab view page. Please change your password the first time you login. Thereafter, you will be prompted to change your password quarterly. Please use a combination of at least 6 lower and upper case letters, numbers, and symbols to create your password or passphrase.

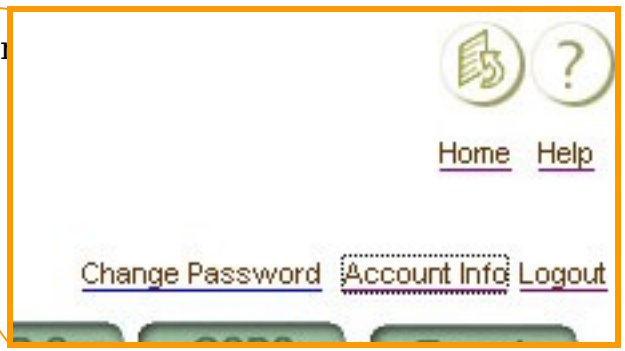
- An example of a good passphrase is: **R6MmeS+** e.g.: **R**ainy **6** (e.g. “Saturdays”) **M**ake **me S +** (e.g. “add”)
  which equates to: “*Rainy Saturdays make me sad*” It’s easy to remember a passphrase like this!!

Manage your Personal Info:

Modify your personal information using the **Account Info** link in the top right corner of any SigWarNet content page. Please go to this link after your first log in, and verify/update your information. Content areas include:

Main: change your name or email address, and/or add a picture of yourself to the database
Preferences: input a nickname, maiden name, date of birth, **DO NOT CHANGE** default group or default home page
Contact Info: input home and office addresses, and home telephone number.





Portlet View (or Tab View):

The "Portlet View", also known as the "Tab View" is the primary interface used to view SigWarNet contents. Tabs and sub-tabs are used to navigate throughout the portal.

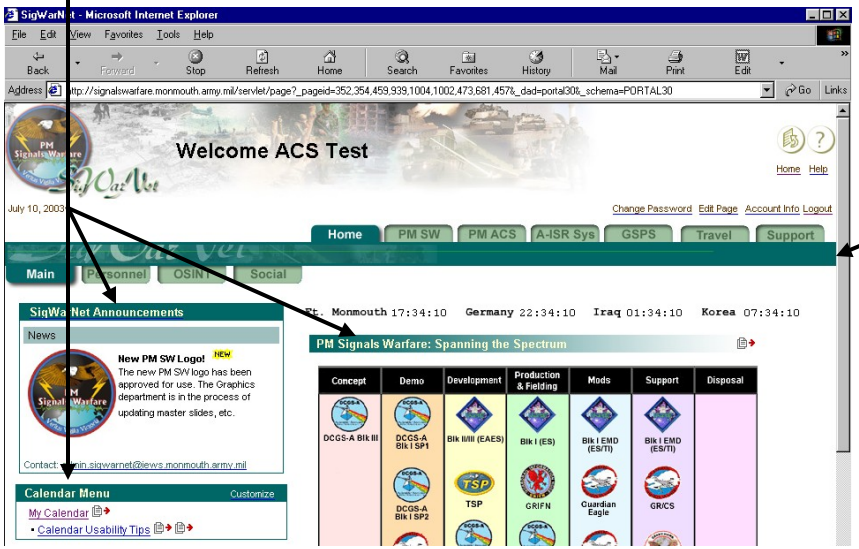
- "Portlets" are containers inside portals. SigWarNet portlets are indicated by either a solid or faded green **portlet header** bar with the portlet title in it.

Portlets

- The upper row of tabs, or "parent tabs" are used to navigate primary content areas, including the PM Program areas, Travel, Support and Home.

- "Child tabs" or sub-tabs appear underneath most parent tabs, and are used to navigate within a particular content area. Some areas of the portal may have sub-sub tabs.

Tab Bar

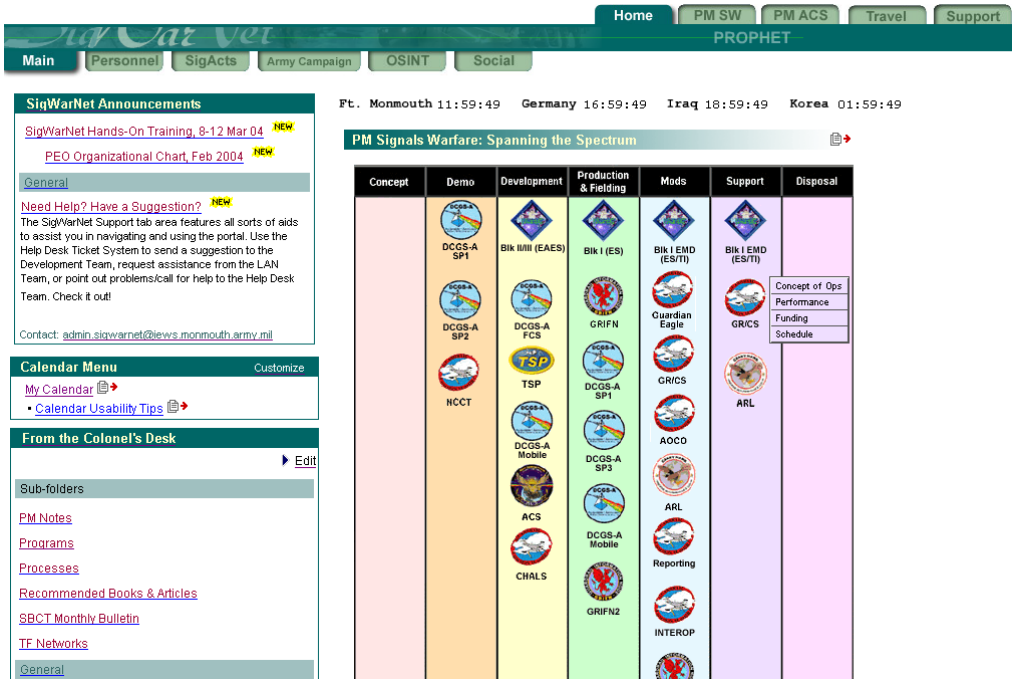


*(**Note:** The tabs each user sees on SigWarNet will vary, as each user's privileges and group memberships are different. This is true for both parent and child tabs. In the example on this page, the ACS Test user does not have access to view the PROPHET tab or any pages under it.)*

SigWarNet Tabs- Home

Main Portlets:

- World Times
- SigWarNet Announcements
- Calendar
- From the Colonel's Desk
- About Team Signals Warfare
- PM Signals Warfare: Spanning the Spectrum
- Show All PMSW Items Uploaded In:
- Search
- Saved Searches
- Add Favorites



Announcements

- Can be set to expire in a certain number of days
- You can add a text message as an announcement
- Or attach a file

To add an announcement:

1. Go to the Announcments portlet.
2. Enter the folder view.
3. In the folder view click Edit Folder.
4. Select Add Item.
5. Complete the Add Item Wizard.

SigWarNet Announcements
SigWarNet Hands-On Training, 8-12 Mar 04
General
Need Help? Have a Suggestion?
The SigWarNet Support tab area features all sorts of aids to assist you in navigating and using the portal. Use the Help Desk Ticket System to send a suggestion to the Development Team, request assistance from the LAN Team, or point out problems/call for help to the Help Desk Team. Check it out!
Items awaiting approval
Manager Approval Description
NEW
Document explaining the manager approval feature.
Contact: admin.sigwarnet@iews.monmouth.army.mil

Most likely, after you ADD an ITEM it will be listed in the ***Items awaiting approval*** region of the portlet.
While it is there it is only visible to:
1) YOU
2) CONTENT AREA MANAGER
Your content area manager must approve the item before it becomes visible to others.

Show All Items Uploaded in:

- Basically saved search links
- Last 24 Hours
- Last 7 Days
- Last 30 Days

Click the links to run the search.

Search

- Type your keyword or words into the Search For field and click Go or hit Enter on your keyboard.
- If you want to search an entire phrase, place them in single quotes like this: ‘interest list’
- Your results will display in a separate window with the number of items found, date, path, author and a link to the items.
- To Exit and return to the previous page, just click the Home button in the upper-right corner.

Personal Folder

- All content areas consist of folders, each of which holds the folder's contents or collection of related items
- Personal Folder can only be viewed by the owner- No one but you can view items
- Good for working from home or on the road
- Can use as a staging area
- Can use as a temporary container for files

Folders View:

The Folders View allows you to move easily between folders, and to perform advanced actions. Folders contain sub-folders and/or various file types. Most people have their web browsers set to display hyperlinks as underlined. Even if you don't, however, if you move your mouse cursor arrow over a **portlet header** and it turns into a hand icon, you know it is a clickable link to go into the Folders View. From the Folders View you can browse through all of the folders that you

gWarNet.

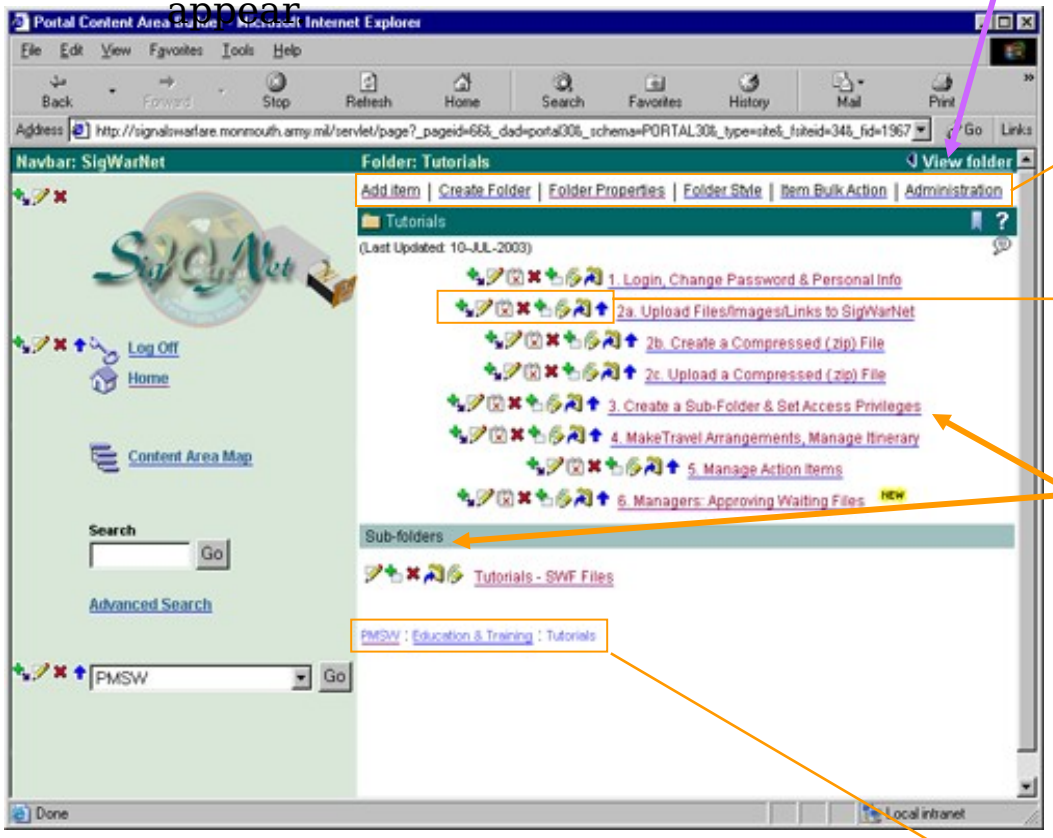
Click on the Folder name in the **Portlet Header** to access the Folders View.

Tutorials
1. Logon & Change Password Tutorial
2a. Upload Files/Images/Links to SigWarNet
2b. Create a Compressed (.zip) File
2c. Upload a Compressed (.zip) File
3. Create a Sub-Folder & Set Access Privileges
4. MakeTravel Arrangements, Manage Itinerary
5. Manage Action Items
6. Managers: Approving Waiting Files

- The left navigation column in the Folders View features:
  - A Log Off link.
  - A Home button to take you back to the SigWarNet **Content/Tab View**.
  - A Content Area Map to all SigWarNet Content Areas & Folders.
  - A Search box and a link to Advanced Search for finding files.
  - A Drop-down Menu which allows you to Jump between top-level folders.

Manage/Edit Features in Folders View:

Manage folder items and properties by clicking on the Edit/View Folder toggle link. Notice all the new control links and icons that appear.



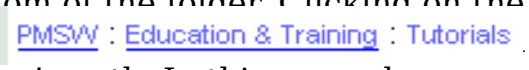
- When the View Folder toggle link appears, so will a row of folder I

- File management icons will also appear next to individual files over each icon to see the associated action.

*(**Note:** You may not have full modify privileges on some folders, thus the icons on your page may appear a little different from the screenshot at left.)*

- Announcement files in a folder are shown as links at the top of the screen, while files in the General or any additional Sub-folders will appear below. Click on any filename or sub-folder to open it up.

- The path of the current folder you are in will **always** be shown in blue at the bottom of the folder. Clicking on the und



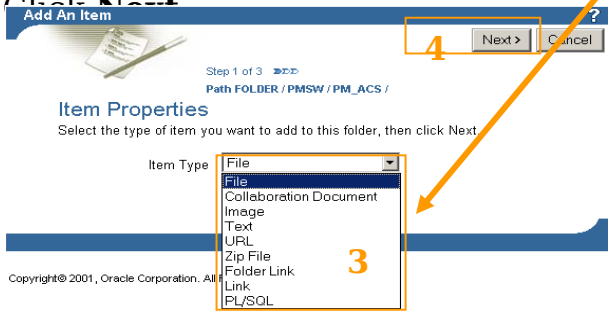
the folder's path. In this example, we are in the sub-folder Tutorials, which is contained in the top-level folder Education &

Uploading, Editing and Deleting Documents and Files

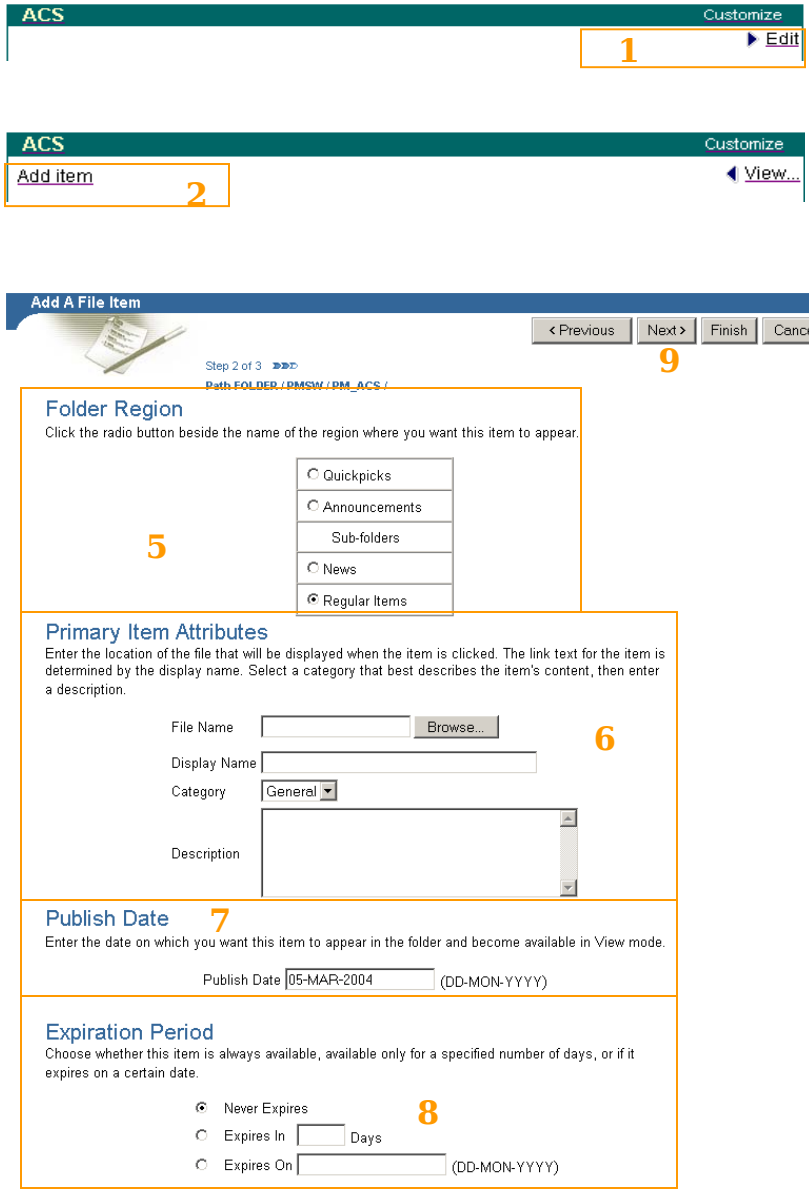
- Migrate files from J: drive onto SigWarNet
- Can work on files outside of Fort Monmouth at home, on the road, anywhere in the world
- In some areas it will appear under items awaiting approval until it receives manager approval
- Display name and descriptions are used in keyword searches

Add Items Wizard

1. Click on the **Edit** link to switch to Edit view.
2. Click **Add item**.
3. Select the **Item Type**. The most common choices are: **File**, if you want to add a document (doc, xls, ppt). If you want to add a text message choose **Text**. You can also choose **Collaboration Document** which is like adding a file, but with the added collaboration features.
4. Click **Next**.



5. Select the **Folder Region**. Usually Regular Items.
6. Under **Primary Item Attributes** select the **File Name** by clicking **Browse**. Enter the **Display Name** (this is the name as it will appear to others). Add a document **Description** to aid keyword searching.
7. The **Publish Date** will automatically populate with the current date. However, you can change the date to make the document visible in SigWarNet on a set date.
8. **Expiration Period**. By default the item will never expire. You can set it to expire in a set number of days (good for news and announcements) or to expire on a specific date.
9. Click **Next**.



Add Items Wizard- Part 2

It is not necessary to enter Secondary Item Attributes to add an item.
However, if you would like to add additional **Basic Search Keywords** you may do so here.

You can **Enable Item Check-Out** in this screen. Select this to give end users the ability check-out the item before editing it, thus preventing other users from simultaneously attempting to delete, edit, or move the same item.
Note: When an item is enabled for check-out, users click the check-out icon to check the item out, then click the check-in icon to check the item back in when they have finished editing it.

You can also **Hide Item**.
Select to hide this item in View mode.
Note: Even when an item is hidden, it is still visible to authorized users in Edit mode so that it can be edited or deleted.

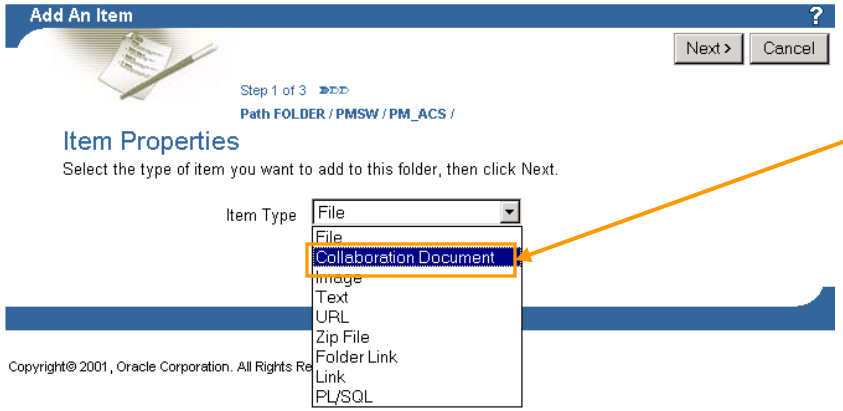
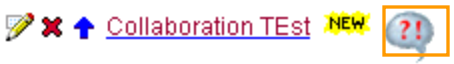
Document Collaboration

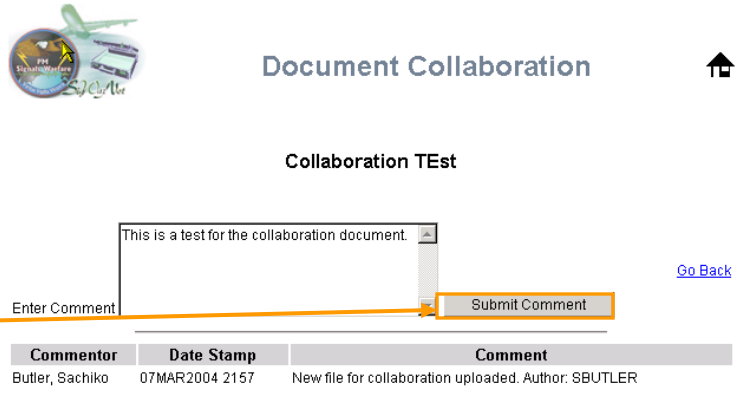
Let's say you want to collaborate on a document with another SigWarNet user. You can add a collaboration document which allows other users to comment on your document.



1. In Folder View click ***Add Item***.
2. In the ***Add Item Wizard*** select ***Collaboration Document*** from the Item Type drop-down menu.
3. Click ***Next***.
4. Complete the rest of the wizard. Click ***Finish***.



5. The folder will display the collaboration document with the following icon:
6. Click the icon to enter the ***Document Collaboration*** screen.
7. Enter a comment. Click ***Submit Comment***
8. The comment you entered will appear the next time you click the document collaboration icon.



Creating Sub-Folders in Folders View:

To Create a Sub-Folder, just enter the Folders View. If you have the right to add folders, the Create Folder link will be available.

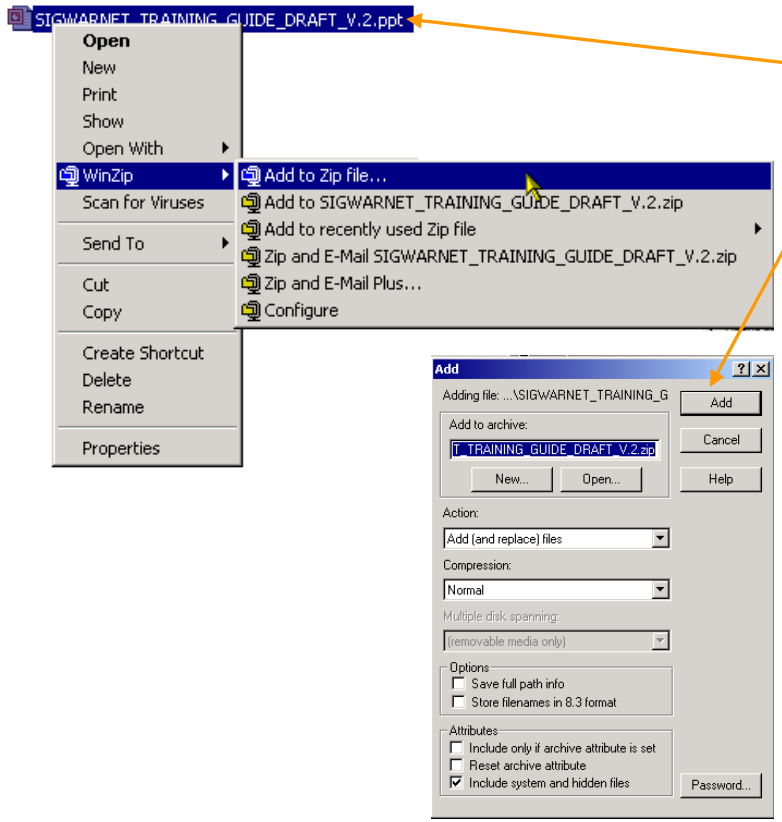
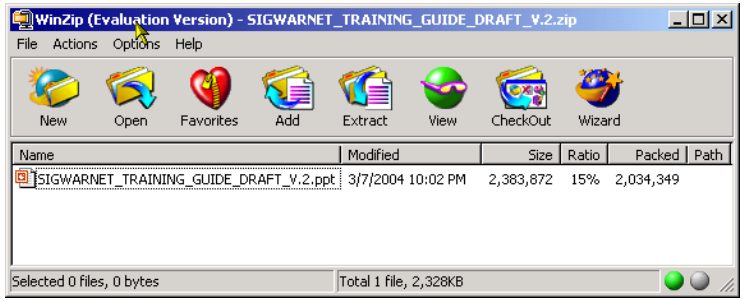
4. Click ***Close***.

Creating Zip Files

Let's say you want to upload a very large file or multiple files in a folder. This can be a problem if you are on a network that is slow. To make large amounts of data smaller and faster to upload- ZIP it! When you zip most files you will notice a size difference.



1. Find a file or folder you want to zip.
2. ***Right-click*** the item. On the context menu select ***WinZip*** and on it's submenu select ***Add to Zip file...***.
3. The Add window will appear. Click **Add**.
4. Winzip will zip the file. When it is done you will see the .zip file in your folder.



WinZip (Evaluation Version) - SIGWARNET_TRAINING_GUIDE_DRAFT_V.2.zip
File Actions Options Help

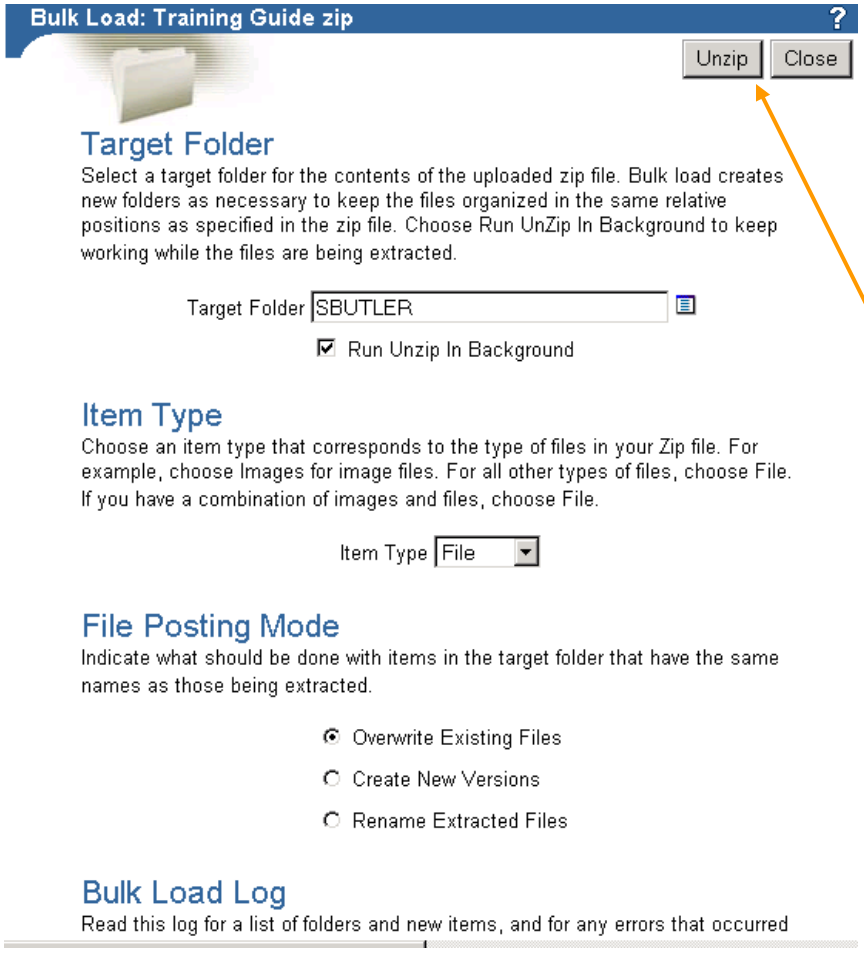
SIGWARNET_TRAINING_GUIDE_DRAFT_V.2.zip 1,987 KB WinZip File

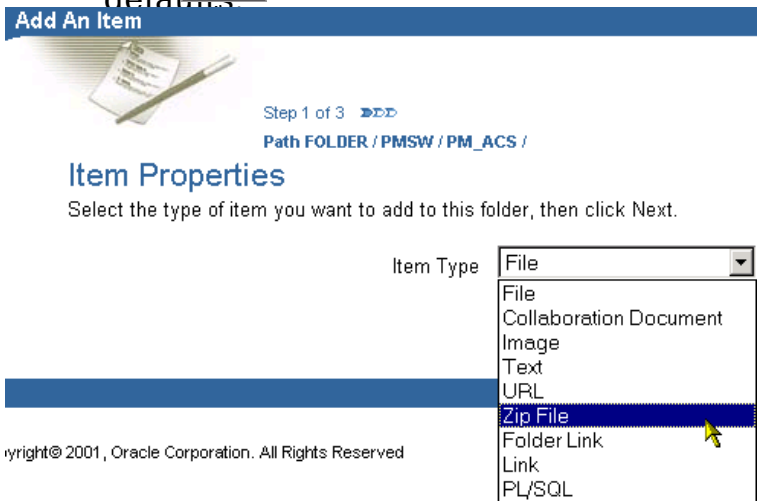
Uploading and Unzipping Zip Files

Now that you have a zipped file you can add it to your folder using the Add Item Wizard.



Bulk Load: Training Guide zip
Unzip
Close
Target Folder
Select a target folder for the contents of the uploaded zip file. Bulk load creates new folders as necessary to keep the files organized in the same relative positions as specified in the zip file. Choose Run UnZip In Background to keep working while the files are being extracted.
Target Folder SBUTLER
Run Unzip In Background
Item Type
Choose an item type that corresponds to the type of files in your Zip file. For example, choose Images for image files. For all other types of files, choose File. If you have a combination of images and files, choose File.
Item Type File
File Posting Mode
Indicate what should be done with items in the target folder that have the same names as those being extracted.
Overwrite Existing Files
Create New Versions
Rename Extracted Files
Bulk Load Log
Read this log for a list of folders and new items, and for any errors that occurred

1. Go to the folder view and click **Add Item**.
2. In the Add Item Wizard select ***Zip File*** on the Item Type drop-down menu.
3. Complete the rest of the wizard.
4. The Zipped Training Guide zip NEW Unzip **Unzip** link beside it.
5. Click **Unzip** to begin unzipping the file into the folder on the portal. Keep the defaults.



SigWarNet Tabs- Travel

- Update My Profile

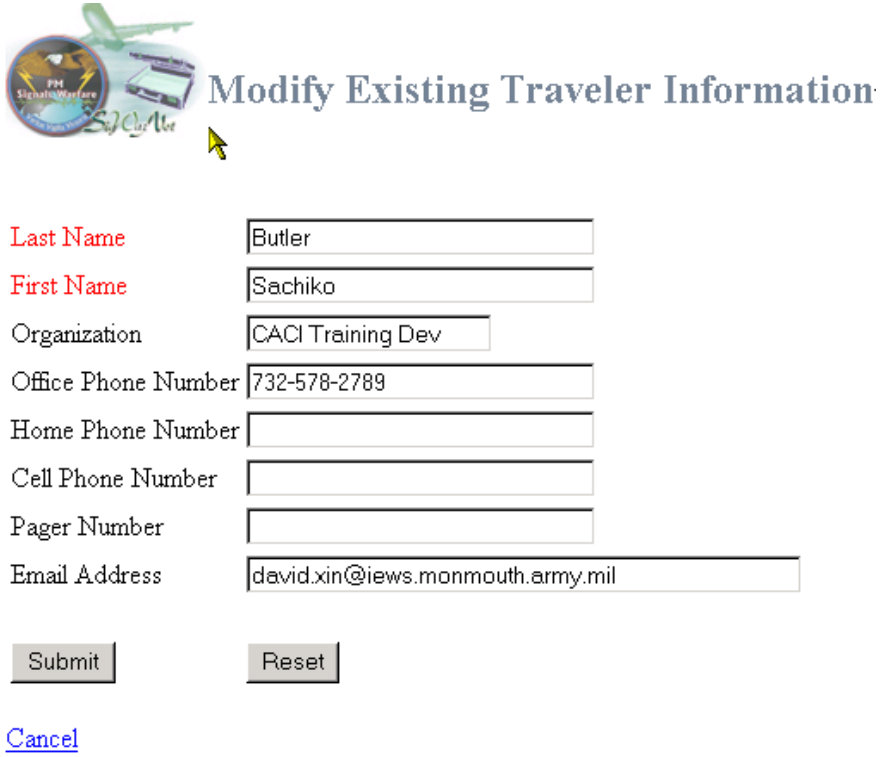
Itinerary Menu- Modify Existing Traveler Inform

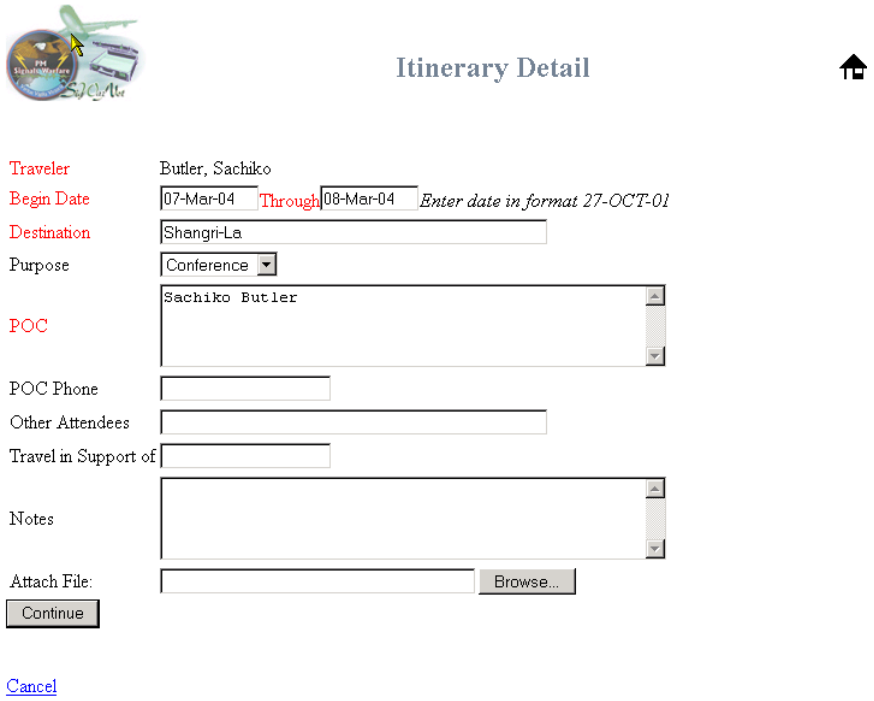
The itinerary menu lets you add your itinerary and modify it so that you and your teammates can keep track of travel information.

Make sure your travel profile is current by clicking **Update My Profile**. You can enter your information here.

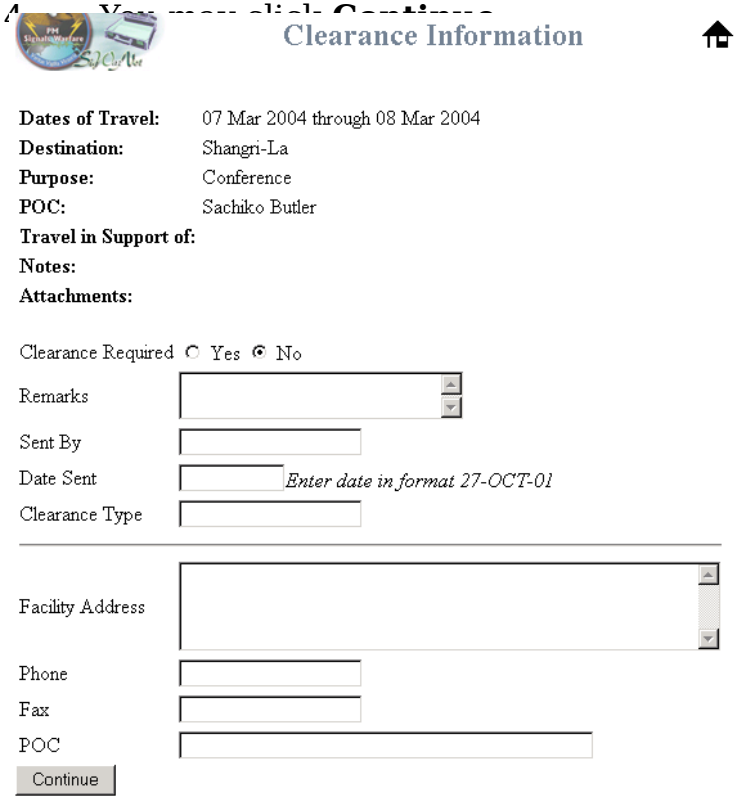


Itinerary Menu- New Itinerary Detail and Clearance Info

You can enter a New Itinerary by clicking the **New Itinerary** link. All RED fields are required. You can get around filling out the entire form if you have a file from the travel agent. Then you can attach the file. In that case, you only have to fill out the RED fields



1. Fill out the Itinerary Detail.
2. Click **Continue**.
3. The Clearance Information screen appears.
4. You may click **Continue**



Itinerary Menu- New Itinerary- Access Control L

Select who else should be able to read or be notified of your itinerary. Only those with the .mil email can get notification.

Access Control List

Admin Support & Managers are able to view all itineraries. Your Admin Support will receive notification of this itinerary.
Select up to 6 other travelers to view this itinerary and/or receive notification of it.

Dates of Travel: 07 Mar 2004 through 08 Mar 2004
Destination: Shangri-La
Purpose: Conference

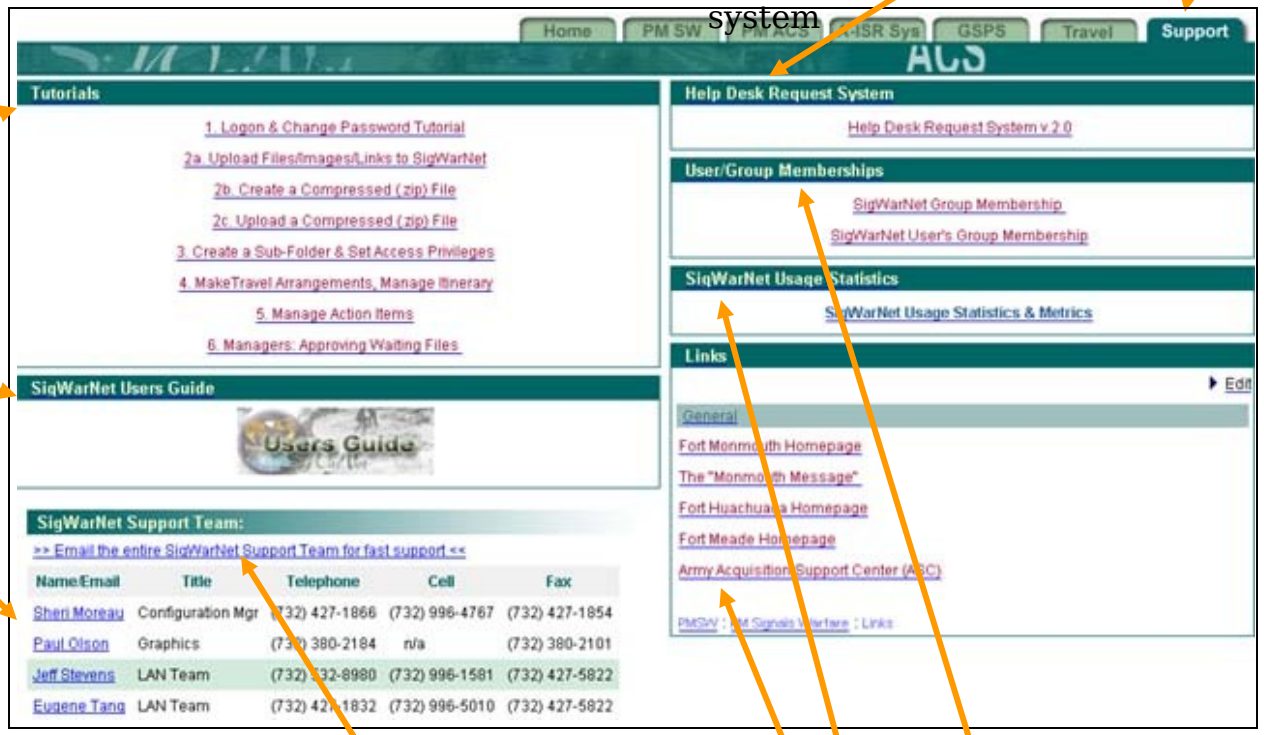
Support Tab Features:

The SigWarNet Support tab contains links to many useful tools. Feel free to click around in this page to see what is available. In particular, please take the time to work through the tutorials to increase your efficiency!!

Support tab

• Help Desk Ticket system



• Short, online tutorials

• User's Guide

Contact info for individual SigWarNet and LAN admin team members.

Email the entire SigWarNet Help Desk Team at once:
Admin.SigWarNet@iews.monmouth.army.mil

• User/Group Memberships

• Usage Statistics

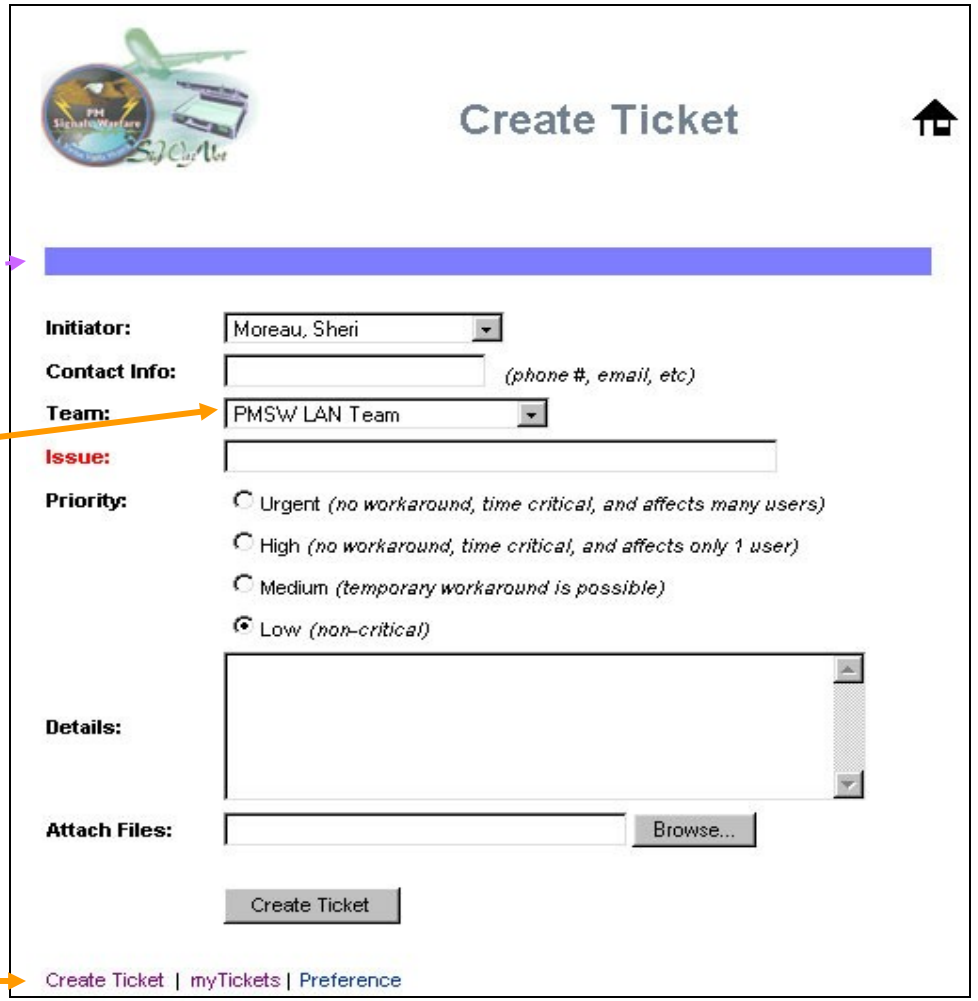
• Links

You can access the Help Desk Request System from anywhere in SigWarNet by clicking the link on the top right of SigWarNet.

Support - Help Desk Request System:

The Help Desk Request System is used to prioritize and track trouble-shooting needs, to report problems with the PM SW LAN or SigWarNet, and to make suggestions for improvements.

Click on the Help Desk Request System link to bring up the



- When filling out the Create Ticket form, select the team you think should address your particular issue. Once your ticket has been submitted, it will be assigned to a team-member. You will receive email-notification as your ticket is acted upon, **unless**:
  - You do not have an iews.monmouth.army.mil address. Non-iews SigWarNet members must monitor their tickets using the myTickets link; or,
  - You modify your Preferences to not receive email.
- Use these links to navigate within the Help Desk system, monitor your ticket's progress, and manage your email notification Preferences

Support - SigWarNet Usage Metrics:

The SigWarNet Usage Stastics portlet (found under the Support Tab) contains an overview of portal usage figures by month. A detailed breakout of metrics within each month is also a

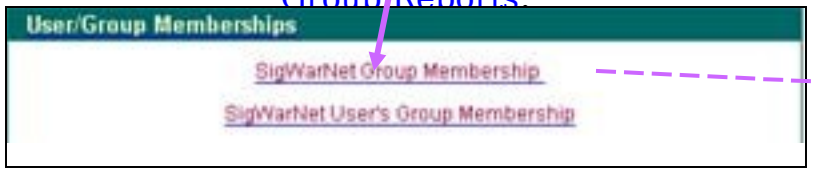
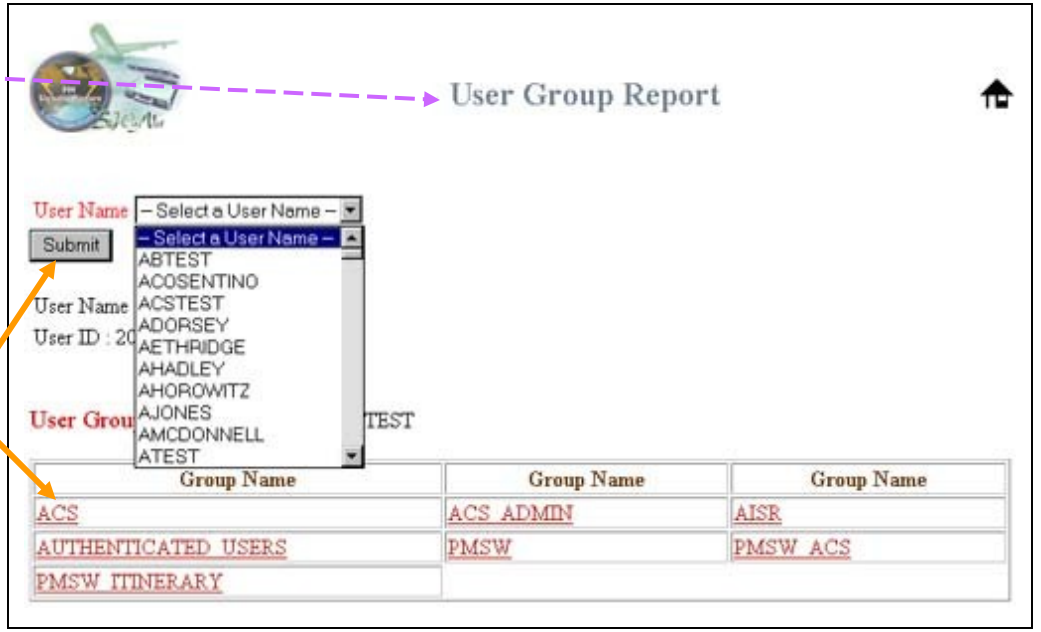
Support – User and Group Memberships:

The User/Group Memberships portlet (found under the Support Tab) has two options. The first option, SigWarNet Group Membership, is used to search on and select a Group and then bring up a list of all members of that Group. The second option, SigWarNet User's Group Membership, is used to search and select an individual user, and then view a list of all Groups that individual is a member of.

Click on the Group Membership or User's Group links to bring up the Group Reports.





- The User's Group Membership has a dropdown list of users, while the SigWarNet Group Membership link allows the user to select from a dropdown list of the Groups associated with SigWarNet Access Control.
- In either case, once a User or Group has been selected, press the Submit button to produce a report table of either the groups associated with a user, or the users associated with a group.
- Clicking on a User or Group listed in the report table will take you to a new report table for that User or Group. For instance, clicking on PMSW will show you the User Group Report for PMSW (e.g.: a listing of all users in the PMSW Group), while clicking on

Icon Guide

At any time you can discover what an icon is useful for by resting your pointer over it. That is also known as a “mouse over”.

Results will open in a new browser window.

New Item- This appears next to a new item until

Edit- If you don’t see Edit, then they don’t have the right to add to that folder

View

Property Sheet- a quick way to display folder or item information

Document Collaboration- this is a collaboration document and your team can add comments to it.

Thank You!

This marks the completion of SigWarNet training.

Thank you for your participation.

Please take a moment to complete and hand in the Training Evaluation form online. As always, feel free to call or email the SigWarNet trainer if you have any questions regarding SigWarNet.
